

Slot	Day, Time	Speaker	Topic
1	M, Dec 10, 2.00	Dormody	(14) Photon polarization in the Compton scattering, Bremsstrahlung and $e+e-$ pair-production cross sections, and astrophysical applications
2	M, Dec 10, 2.30	Anderson	(12) Axion models and cosmological axion production mechanisms
3	M, Dec 10, 3.00	Aune	(13) Axion search experiments and astrophysical constraints
4	W, Dec 12, 1.30	Kehayias	(10) Gauge coupling unification in the Standard Model, in its supersymmetric extensions and in other beyond the Standard Model frameworks
5	W, Dec 12, 2.00	Kollipara	(11) Overview of baryogenesis models and status of GUT baryogenesis
6	W, Dec 12, 2.30	Wu	(9) Monopole searches: current status, prospects and overview of the constraints on Grand Unification and Inflation models
7	W, Dec 12, 3.00	Zalewsky	(8) Status and prospects of proton decay searches, and impact on Grand Unification models
