

Reps Meeting - Asilomar

Papers

- The anisotropy result is potentially very interesting
 - We need to get a result out soon
 - Gus showed it at the ICRC
 - We need to understand what this means
 - We may need to bring in some help for this...
- Same is true for the solar results
 - We need to publish them
 - We may need some outside help on interpretation and this is OK

Other issues

- **Authorship**
 - PI's from each institution will decide who should be on papers
 - People who are not still here must acknowledge that they have read and agree with paper
 - MSU is officially on
 - **We must fix the low voltage system**
 - We need to improve reliability
 - Maybe we need to replace the Ferrups supplies with Fortesses
 - Space may be an issues
- 

Other issues

- Spokesperson election
 - I am up for re-election/re-call
 - Who is eligible to be spokesman?
 - Regular Faculty
 - Research Scientists
 - Who can vote?
 - Current members of the collaboration
 - Grad students can vote
 - UGs can't
 - GBY will send out mail with list
- 

Other issues

- Coming out to Los Alamos
 - Sign up for shifts
 - Make sure your paperwork is up-to-date
 - Cryptocards should be checked
 - If your badge is expired – make sure not to show it if you need to get in. (US citizens only)
 - Make sure your collaboration agreement is up-to-date
-
