During the summer of 2013, up to 12 High School Internships will be available at SCIPP (Santa Cruz Institute for Particle Physics)! Students will learn about Cosmic Rays, work on Cosmic Ray Muon Detectors, and participate in interactive lectures on cutting-edge topics in particle physics and cosmology by SCIPP scientists.

Apply Here:

http://scipp.ucsc.edu/outreach/HS_Interns/index.html

For any students interested in physics or astronomy, this is a great opportunity to explore those areas with scientists. There is a stipend available for the 6 –week internship from June 17th to July 26th 2013.
