DUE: THURSDAY FEBRUARY 4, 2010

To receive full credit, you must exhibit the intermediate steps that lead you to your final results. The nth problem in Boas from section $a.b$ is designated by $a.b$–n.

1. Evaluate the integral

$$I_n = \int_0^\infty t^n e^{-kt^2}\, dt\,,$$

for $k > 0$ and $n > -1$. [*HINT:* By a suitable change of variables, show that I_n can be expressed in terms of the defining integral for the Gamma function.]
